CHORD ARM – turns on top of the disk

ON YOUR WHEEL – C up to D

Slide-a-Key

Chord Arm

~ Pocket Edition add-on ~

find the three main chords in any key

OPTIONAL ADD-ON!
FITS YOUR POCKET EDITION!
I, IV AND V
IN ALL 12 KEYS!
(WHEEL NOT INCLUDED)

Assembly

1. Print at 100% (no "fit to page"). Optional: glue onto cardstock first.
2. Cut out the arm along the dashed line, then cut out its three windows.
3. Poke a small hole through the + in the middle of the coin.
4. Open your Pocket Edition's fastener, put the arm on top of the disk and close it again.
5. To move the arm, hold the disk still with your thumb and turn just the arm.

What are I, IV and V?

In every key, three chords do most of the work: I is the key's own note, IV is five steps clockwise and V is seven. Lots of songs use only these three.

Quick Example: C up to D

Set the wheel as usual, with the inner D beside the outer C, then turn the arm so I points at C. The windows show C, F and G with D, G and A beside them: the three main chords, moved up. Song in G instead? Point I at G, and G, C and D become A, D and E.

Thank you for choosing Slide-a-Key!
